CULTIVATION SHEET

"Family of flowering plants whose leaves contain many small glands, which secrete essential oils that make them particularly aromatic."

Family: Labiates

some examples: *basil,*
catnip, hyssop, lavender,
marjoram, horehound,
lemon balm, oregano,
rosemary, savory, sage,
thyme

SOWING TREATMENT FERTIRRIGATION	DOSE
IN SEEDBED: Start by wetting the substrate when sowing and continue until the moment of transplantation, with weekly interventions	1:800 or 125 ml/hl
OPEN FIELD: wet the soil immediately after direct sowing	1:600 or 167 ml/hl
TRANSPLANTATION TREATMENT fertigation	DOSE
during the transplantation of the plant 4th-5th leaf	1:500 or 200 ml/hl
FOLIAR TREATMENT	DOSE
5th/7th leaf	1:600 or 167 ml/hl
After the 7th leaf	1:500 or 200 ml/hl
During vegetative development up to periodic mowings included	1:500 or 200 ml/hl
<i>Repeat every 6/7 days based on seasonal conditions and to make the environment unwelcome to insects and pests in the most critical periods, perform the foliar treatment after each mowing.</i>	
FERTIGATION	DOSE
5th/7th leaf	1:500 or 200 ml/hl
After the 7th leaf	1:300 or 333 ml/hl repeat every 14 days
FLOATING SYSTEM Technique	
SOWING TREATMENT	DOSE
By sowing on an alveolar container floating in water	1:600 or 167 ml/hl
FOLIAR TREATMENT	DOSE
2nd/4th leaf	1:800 or 125 ml/hl
4th/7th leaf	1:600 or 167 ml/hl
After the 7th leaf	1:600 or 167 ml/hl
During vegetative development up to and including periodic mowing	1:600 or 167 ml/hl
<i>Repeat every 5/6 days based on seasonal conditions and to make the environment unwelcome to insects and pests in the most critical periods, do the foliar treatment after each mowing.</i>	

Compatibility:

The product has no contraindications for miscibility with other formulations.

It is advisable to carry out compatibility tests on crops on small surfaces before extending the treatment to larger areas.

Warnings:

To be used exclusively in agriculture.

Whoever uses the product is responsible for any damage resulting from the improper use of the product.

Compliance with the aforementioned instructions is an essential condition to ensure the effectiveness of the treatment and to avoid damage to plants, people, animals.
